THE ENGLISH LANGUAGE

1. English is a West Germanic language originating in England, and the first language for most people of Australia, Canada, Ireland, New Zealand, the United Kingdom, and the United States. It is used extensively as a second language and as an official language throughout the world, especially in Commonwealth countries such as India and South Africa, as well as in many international organizations.

2. Modern English is sometimes described as the world lingua franca. English is the prominent international language in communications, science, business, aviation, entertainment, and diplomacy and also on the Internet. It has been one of the official languages of the United Nations since its founding in 1945 and is considered by many to be on its way to become the world's first universal language.

3. The influence of the British Empire is the primary reason for the language's initial spread far beyond the British Isles. Following World War II, the increased economic and cultural influence of the United States led to English permeating many other cultures, chiefly through development of telecommunications technology. Because a working knowledge of English is required in many fields, professions, and occupations, education ministries throughout the world mandate the teaching of English, at least a basic level, in an effort to increase the competitiveness of their economies.

4. Over 380 million people speak English as their first language. English today is variously estimated as the second, third, or fourth largest language by number of native speakers. However, when combining native and non-native speakers it is probably the most commonly spoken language in the world, though possibly second behind a combination of the Chinese languages. Estimates that include second language speakers vary greatly from 470 million to over a billion depending on how literacy or mastery is defined. There are some who claim that non-native speakers now outnumber native speakers by a ratio of 3 to 1.

5. Because English is so widely spoken, it has often been referred to as a "global language", the lingua franca of the modern era. While English is not an official language in many countries, it is currently the language most often taught as a second language around the world. Some linguists believe that it is no longer the exclusive cultural sign of "native English speakers", but is rather a language that is absorbing aspects of cultures worldwide as it continues to grow.

Future specialists in various fields of science, technology, economies and art get a fundamental general and specialized training, all students regardless of their specialty study foreign languages.

Apart from educational work and schooling Ukrainian higher schools carry out a great deal of scientific work in all branches of knowledge. They have either a students’ research Society (Club) or a Technological Design Bureau which provide excellent facilities for young researches.
Our country needs specialists in all fields of science and all branches of industry and agriculture. Institutes exist not only in big cities like Kyiv, Kharkiv, Lviv, but in many towns of Ukraine like Irpin.

Higher educational establishments of our country fall into three main types. The first type includes the universities and institutes where there are only full-time students, which receive state grants. Students who do not live at home get accommodation in the hostels.

The second and third types of higher schools provide educational facilities for factory and office workers who combine work with studies. The second type of higher education in establishments includes evening faculties and evening higher schools for those who study in their spare time.

The third type covers extra-mural higher schools where students take correspondence courses. Every year extra-mural students receive from 30 to 40 days’ leave to prepare for their exams.
